

FELIX NOVOA CÓRDOVA

Munich, Germany · +49 151 45990884 · fnovoa@oecc.de

PROFILE

Multilingual architect and sustainability expert with a Master's in Resource-Efficient and Sustainable Building with 5-year experience in energy performance analysis, digital modeling (BIM), and interdisciplinary collaboration for architectural and consulting projects. Currently working at vion energieconcept GmbH.

PROFESSIONAL EXPERIENCE

2026 – Present

vion energieconcept GmbH, Munich, Germany
Architect in Energy Consultation · on site

• Manage end-to-end energy consulting projects for residential buildings, new construction, and commercial properties.
• Conduct energy assessments, building simulations and develop individual renovation roadmaps (iSFP), energy-efficiency concepts and Life Cycle Assessment.
• Coordinate directly with clients, assess renovation measures, and deliver technical recommendations throughout the project process

2023 – 2026

OECC Concepts & Consulting, Munich, Germany
Working Student – Project Assistant · on site

• Support consulting and analysis projects in the fields of building efficiency, automation, and workplace management.
• Assist in site analysis, data preparation, and documentation for public and private clients.
• Develop 3D visualizations and layouts using CAD, QGIS, Adobe (InDesign, Illustrator, Photoshop), and Microsoft Office.

2022 – 2023

SGE Consulting, Remote
Energy Consultant Assistant

•Created detailed 3D building models integrating design and energy performance data.
• Conducted preliminary energy assessments using Hottgenroth Energieberater.
• Supported the preparation of renovation roadmaps (Sanierungsfahrpläne) and energy certificates

EDUCATION

2026 — **Technical University of Munich (TUM)**
M. Sc. in Resource-Efficient and Sustainable Building (120 ECTS)
Focus: Sustainable Construction · Energy Efficiency · Life Cycle Assessment · Fire Protection.
Thesis: *From Roman to Modern Engineering – Evaluating the Life Cycle Assessment of Ancient Lime-Based Mortars for Sustainable Construction Interventions* (Grade 1.7).

2023 — **Technical University of Munich (TUM)**
B.A. in Architecture (240 ECTS)
Thesis: *Festspielhaus Bayreuth – Redesign of the Infrastructure on the Green Hill* (Grade 1.3).
Exchange Year: *Sapienza Università di Roma* – Architectural Design

---

SKILLS

- **Sustainable Design & Analysis**: Sustainable Building Design - Life Cycle Assessment - Energy Modeling - Building Fire Protection – Building Restoration
- **Digital Tools**: BIM – Revit - ArchiCAD - AutoCAD – Hottgenroth Software- QGIS CircularLCA - Microsoft Office - AI Tools & Applications
- **Visualization & Graphics**: Adobe InDesign - Photoshop - Blender - Enscape
- **Research & Consulting**: Energy Assessments - Building Regulations & Construction Law - Interdisciplinary Collaboration- End-to-End Project Coordination

---

LANGUAGES

- **Spanish**- Native (C2) | **German**- Full Professional Proficiency (C1) | **English** –Full Professional Proficiency (C1) | **Italian**–Full Professional Proficiency (C1) | **French**- Working Proficiency (B2) |**Portuguese** (B1)

CERTIFICATIONS & ADDITIONAL INFORMATION

- Harvard Business School Online – Disruptive Strategy Certificate
- Focus areas: Digitalization in Building Operations · Sustainable Urban Planning · Innovation and Resource Management
- Multicultural academic and professional background in Germany, Italy, and Peru
- Strong interdisciplinary mindset bridging design, technology, and sustainability
